

COMPANY PRESENTATION

PORTOBELLO

Vision

We work to strengthen our circular, ethical and innovative business model and to extend our sales network throughout the national territory. We want to ensure the accessibility of quality products to the largest number of customers and enhance the potential of our partners in a framework of sustainable development. Creating growth opportunities is our vision but above all our passion.

Mission

Thanks to a circular and vertically integrated business model, we are able to offer high quality products at affordable prices through assisted sales in our stores. We want to give consumers the pleasure of buying in the physical store: only products of main brands at prices lower than online stores.

Opportunity

Business units

Portobello has a business model organized in three strategic units, vertically integrated to achieve maximum efficiency:

Media

The media business unit deals with the selling of owned or third-party advertising spaces, directly or through barter. Portobello offers to its advertisers spaces in high traffic areas, video walls, magazines and much more.

Retail

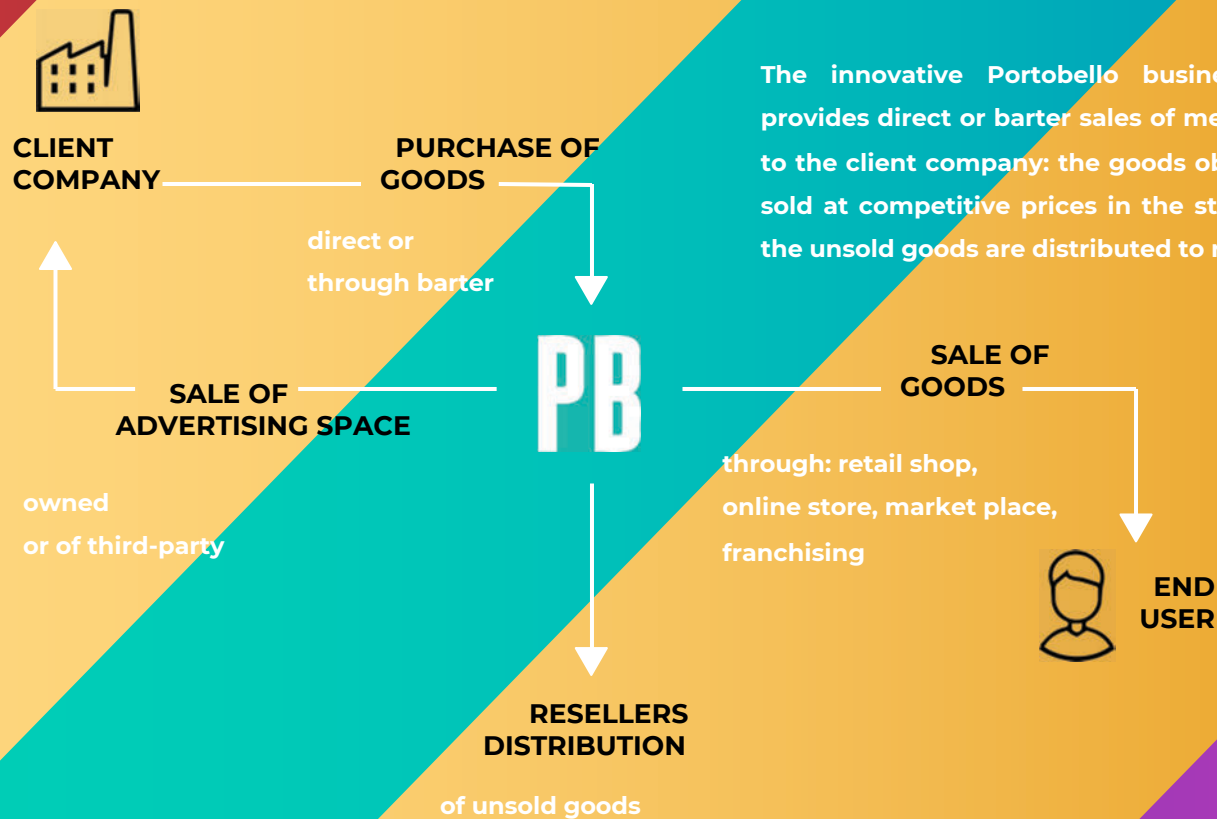

The products obtained thanks to the barter or purchased are sold in the Portobello stores: this allows us to have always different goods on the shelves. Main brands at unbeatable prices, with a complete in-store shopping experience.

B2B

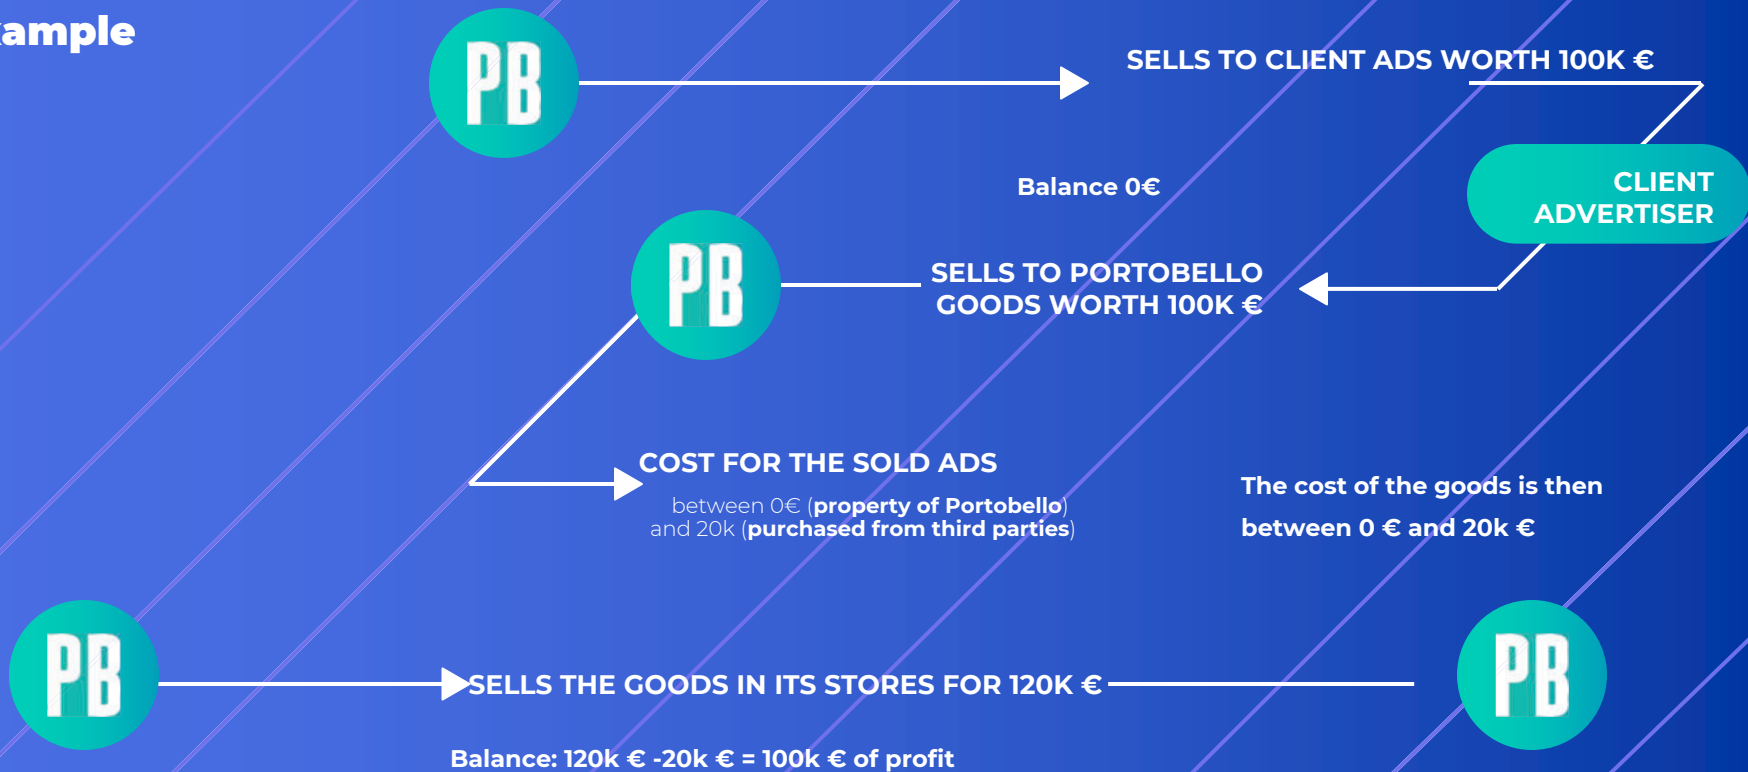

To ensure the best turnover of goods, part of the inventories are sold through B2B channels: this leads on one hand to agreements with international players, on the other to a high rotation of products in the stores.

Business model

The innovative Portobello business model provides direct or barter sales of media spaces to the client company: the goods obtained are sold at competitive prices in the stores, while the unsold goods are distributed to resellers.

Business model example

Pricing policy

Thanks to the innovative business model, Portobello provides consumers with products from the best brands at unbeatable prices, even for online giants like Amazon.
